## Overview

---

Rubicon Fish Fertilizer is an organic, enzymatically digested, liquefied, stabilized fresh fish fertilizer suitable for use as a foliar spray, root-feeder, soil nutrition builder and compost accelerator.

Rubicon Fish Fertilizer can be applied by all normal methods including injection with seed, side-dressing and any type of conventional fertilizer-grade irrigation system or spray rig.

Rubicon Fish Fertilizer stores well in conditions of moderate cold or heat. Concentrate must be mixed well or agitated before dilution with water to ensure a homogenous mix.

## Soil Applications

---

- Dilute 10 to 20 ml per litre of water.
- Diluted product can be sprayed with seed or side-dressed with seed.
- Product can be injected into irrigation spray rigs with water or as a concentrate when water is followed to reach at least a 10:1 dilution.
- Recommended seasonal rate is 10 gallons per acre (undiluted) in one or more applications.

## Commercial Applications

---

- Dilute 1 part of Rubicon Fish Fertilizer to 10 parts water.

## Packaging

---

Available in the following:

- 3.8 L
- 20 L
- 200 L drums
- 1,050 L IBC Totes
